BRITISH RENEWABLE ENERGY AWARDS

2025

12TH JUNE 2025
SHERATON GRAND
HOTEL

The REA has been celebrating our incredible industry of businesses and individuals for 19 years at the annual British Renewable Energy Awards. The first ceremony took place in 2006 and the event has now cemented its place as one of the industry's most prestigious annual celebrations.

This year will be the 20th awards ceremony and gala dinner where we will celebrate all of the innovators - both individuals and organisations - who are helping to grow the UK's energy security, combat climate change and push for net zero by 2050.

Last year at the fabulous Sheraton Grand Hotel in London, we honoured a fantastic line up of winners and finalists. We are building upon past successes and are pleased to announce that this year's British Renewable Energy Awards will again take place at the Sheraton Grand, London Park Lane Hotel in the heart of Mayfair.

We have a superb variety of branding and sponsorship opportunities in association with the 20th British Renewable Energy Awards. The REA team are happy to work with you to understand your requirements and to develop a bespoke sponsor or supporter agreement which will enable maximum brand exposure in the run up to the event and on the night.

As a not-for-profit organisation, sponsorship enables the REA to keep the event accessible for everyone across our diverse industry and shine a brighter spotlight on all the outstanding work being done.

To discuss the range of options available and support the sector and the REA, please email sponsorship@r-e-a.net. We would love to hear from you and to work with you to enable you to reflect your business objectives.

£25,000

ABOUT REA

The REA is the UK's largest trade association for renewable energy and clean technologies with around 500 member organisations operating across heat, power, transport, finance and the circular bioeconomy. The REA is a not-for-profit organisation, established in 2001, representing renewable energy and clean technology companies operating in over 14 sectors, ranging from biogas and renewable fuels to solar and electric vehicle charging, and composting to biomass, giving us a very holistic industry approach. Member organisations range from major multinationals to sole traders.
